Hillside Drainage

I engaged Hillside Drainage to construct a 45m stormwater drainage easement at my home in Rydalmere in May 2012.

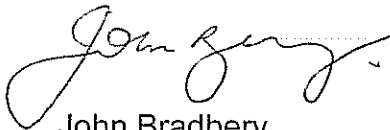

I found John Sultana and his team Marty, Pat, Jeff and Paul very helpful, professional and cooperative throughout the job.

Despite some obstacles in the project working around a pool and existing services, and some bad weather, the work progressed at a steady pace with minimal inconvenience to us and my neighbours. Much of the excavation was by hand with limited access.

I am happy with the outcome and how everything was restored to its previous state. John also repaired a leak in my roof that 2 previous contractors had been unable to repair.

I would have no hesitation recommending Hillside Drainage for drainage works.

Regards
